**DATE:** 22<sup>nd</sup> September 2012  
**To:** Our Valued Customers  
**SUBJECT:** Import Seafreight – Updated Container Quarantine Declaration

---

Good morning,

Please find the below update from NZ MAF about the latest version of the container Quarantine Declaration (QD) that should be used from now on.

MAF have advised:

*A number of Full Container Load (FCL) consignments are being declared on Cusmod that they contain non-ISPM 15 wood packaging. In some instances the wood packaging being declared is exempt from the requirements of the MAF wood packaging Standard (Plywood, MDF or other composite material).*

*The current version of the sea container quarantine declaration allows this exempt material to be declared as the equivalent of ISPM 15 wood packaging. This means that the MAF INTERNAL alert is not triggered*

*The latest version of the quarantine declaration can be found on the [MAF website](#).*

We have attached a word copy of the new QD is attached. Please advise your overseas suppliers to use this form for FCL shipments from now on.

If you need any further information or have any questions then please do not hesitate to contact us here at Oceanbridge.

Kind Regards

Stephen Pipes
